CSA 3 Staying Safe on the Water

Marine Rescue New South Wales launches almost three thousand rescue missions every year.

You can take some simple step to stay safer on the water.

Make sure everyone on board has their lifejacket on. It's just as important if you're on a kayak or canoe or if you're rockfishing.

Maintain your boat and make sure you have enough fuel.

Check the weather and conditions.

Log On with Marine Rescue on VHF Channel 16 or the free Marine Rescue App so we can keep watch for your safe return.
